Prathamesh Lole

B.Tech – Computer Technology

Phone: +91 8591474522 **Location:** Parel, Mumbai loleprathamesh488@gmail.com linkedin.com/in/prathamesh-lole

OBJECTIVE

Enthusiastic B.Tech Computer Science student with a strong foundation in problem-solving, analytical thinking, and software development concepts. Passionate about learning new skills, adapting to new challenges, and applying knowledge through practical projects. Seeking an opportunity to contribute to a growth-oriented organization while enhancing my professional skills and gaining valuable industry experience.

EDUCATION

Ratan Tata Maharashtra State Skills University, Kharghar *2023 – Pursuing*
B.Tech in Computer Technology CGPA: 7.6

Shardashram Vidyamandir, Mumbai *2021 – 2023*
HSC (PCM) 66%

Dr. Antonio da Silva Technical High School, Mumbai *2020*
SSC 85%

TECHNICAL SKILLS

Programming Languages	Java, OOP, Python, C++
Frontend Technologies	HTML, CSS, UI/UX, JavaScript, ReactJS
Backend Technologies	NodeJS, Flask, Spring Boot (MVC)
Databases	MySQL, MongoDB, DBMS
Tools	VSCode, GitHub, Eclipse (STS), Postman (REST API)

PROJECTS

Juicy Drinks Website GitHub
Tools: HTML, CSS, Bootstrap, UI/UX Principles
Developed a dynamic and responsive web application for a beverage store using HTML, CSS, and JavaScript. Implemented interactive features and a modern UI to enhance user experience, providing a seamless platform for browsing and exploring various drink products.

Smart Attendance Management System GitHub
Tools: Bootstrap, HTML, CSS, JavaScript, OpenCV, MongoDB
A smart attendance system using facial recognition to automatically mark attendance. The system captures and verifies faces in real-time ensuring accurate and secure tracking.

Society Management System GitHub
Tools: React JS, Java, Spring Boot, MVC, MySQL, REST API
Developed a Java full-stack Society Management System using Spring Boot and React, implementing role-based dashboards for Admin, Residents, and Vendors. Built secure REST APIs with complete CRUD operations, activity logging, complaint management, and real-time recent activity tracking, ensuring data integrity and scalable system design.

Real-Time Code Collaboration Tool GitHub
Frontend: React.js, HTML, CSS, JavaScript *Backend: Node.js* *Communication: WebRTC*
Developed a real-time code collaboration tool that allows multiple users to edit and run code simultaneously. Built using Node.js, Socket.io, and WebRTC, then deployed with Netlify. Implemented live syncing and seamless multi-user collaboration.

CERTIFICATIONS

- **Java Full Stack Web Development** (Feb 14, 2026) – IT-Vedant Tech Institute
- **Deep Learning** (Nov 16, 2025) – Percipio, Skillsoft
- **Artificial Intelligence** (Feb 28, 2025) – Information Technology Specialist, Certiport
- **SQL Database** (Aug 23, 2024) – Information Technology Specialist, Certiport
- **HTML and CSS** (July 25, 2024) – Information Technology Specialist, Certiport
